

INTRODUCING XPOLL HATS

A Signal Instrument of Work, Reputation, and Measured Execution

The K Hat communicates through structure rather than noise, through execution rather than promotion. It is designed to be recognized in the field, not debated in abstraction.

- It is not a speculative token.
- It is not a meme asset.
- It is not a replacement for licenses, certification, or trade authority.

The K Hat exists as a sector-based signal instrument, designed to reflect the measurable realities of contractors, builders, product sellers, and service providers.

WHY THE HARD HAT

The hard hat represents:
Protection, Responsibility, Accountability, Execution
Physical reality
The K Hat anchors XPOLL to industries that build, repair, install, and deliver.
This is not digital abstraction.
This is real-world work becoming measurable signal.
